

*"XPRIZE is helping organizations like us transform healthcare by turning the "art" of medicine into a science, and making health a willing part of individuals' daily lives. Along with XPRIZE we hope to create a platform for everyone to stay healthy and fit independent of visits to clinics."*

- Team Danvantri

## **DANVANTRI**

**HEADQUARTERS:** Chennai, Tamil Nadu, India

**TEAM WEBSITE:** [www.vitalsplus.com](http://www.vitalsplus.com)

**TEAM LEADER:** Sridharan Mani

### **TECHNICAL INNOVATION**

In the current phase of Danvantri development, the technology will have integrated blood pressure, temperature and pulse oximeter (to measure oxygen saturation) in a single device, which is developed and is awaiting clinical trials. We are in next phase of development to integrate ECG, spirometer, blood chemistry analyzer and glucose.

### **ABOUT OUR TEAM**

Danvantri is the name of Medicine God in India. Our goal is to empower every one on the planet with the right to know their, or their family's vital health data without depending on a physician until there is a real need for it.

We are a dynamic group of talented professionals with over 200,000 combined man-hours in embedded systems and IT. Our team is dedicated to developing cost effective preventive healthcare solutions based on mobile technologies. We want to make healthcare affordable and we want to make life easier for every one with the help of a portable all-in-one healthcare device. We are a team of excited and positive members who are proud to become part of an initiative that will make us pioneers of the well-connected wireless healthcare world.

### **ABOUT OUR TEAM LEADER**

Sridharan Mani holds 20+ years of IT-related senior leadership experience; building businesses, handling important corporate and client leadership roles, and solidifying profitable C-level relationships at Fortune 500 companies in finance, technology, manufacturing, healthcare, telecom and education. Sridharan holds an MBA from Emory University – Goizuetta School of Business.

### **ABOUT THE PRIZE**

The Qualcomm Tricorder XPRIZE is a \$10 million global competition to stimulate innovation and integration of precision diagnostic technologies, helping consumers make their own reliable health diagnoses anywhere, anytime. Putting healthcare in the palm of your hand.
